

Tree Care Programme 2023/24

The Tree Care Programme pertaining to the Dundrum Area Committee is outlined below in two tables. The Arboricultural Works (Remedial Tree Works) is listed in Table 1 and the Tree Planting is listed in Table 2. All requests to date have been included.

Tree works are underway at present pertaining to the 1,940 trees (Table 1) by contractors and by our own staff (180 are removals). The planting of 3,345 new trees (Table 2) will commence later this month and will be completed by end of March/early April 2024 as part of the tree care programme – these trees range from small to standard and specimen trees.

Last spring, the Parks Section facilitated the planted approximately 5,850 native woodland trees by the community over 5 days to form four new woodlands in the west of the county at Cabinteely Park, Fernhill Park, Nutgrove and Orby Park. This year we are focusing on the maintenance of these woodlands and will be organising maintenance days in the coming 2-3 months. The maintenance of these woodlands is equally, if not more important than the planting to ensure their survival and establishment. We plan on facilitating the planting of approx. 500 native woodland trees in Belarmine in the coming months in another community woodland project.

Last year we also placed labels on the newly planted street trees to encourage the community to assist with watering the trees. Although 2023 was a particularly wet year and this definitely helped with the increased survival rate of newly planted trees we hope the public's assistance with the watering of trees outside their homes will also improve the survival rates going forward.

We have also adapted the new dlr Tree Strategy 2024-2030 A Climate for Trees, this will assist us “to manage and develop our urban forest together for community well-being and climate resilience.” The urban forest must be sustainable and climate resistant and we need to work in partnership with the communities to ensure this is achieved. The annual work included in the Tree Care Programme significantly contributes to realising this vision.

Table 1 Tree Works 2023/24

| Location | Quantity | Work to be carried out |
